NetLibrary Guide

Available **NOAA-wide**, NOAA's NetLibrary eBook Collection features more than 300 eBook titles, with over 200 Information Technology (IT) titles, covering such areas as HTML, XHTML, XML, Visual Basic.Net, CGI, Dreamweaver, PHP, Apache, MySQL Web Development, and more.

Access

NetLibrary books can be accessed from your desktop three ways.

- eBook titles can be accessed via the library's catalogue. If you find a NetLibrary title listed in **NOAALINC** (located at <http://www.lib.noaa.gov/uhtbin/webcat>), click on the link to access the full text eBook at the NetLibrary site.
Note: You can limit your NOAALINC search to NetLibrary titles selecting "Electronic books" under "type" in the search fields.
- Follow the NetLibrary link from the NOAA Central Library website at <http://www.lib.noaa.gov> and clicking on "NOAA Central Library Electronic Books".
- Access NetLibrary directly from your desktop at <http://www.netlibrary.com>.

Basic Search

On the NetLibrary homepage you can search for eBooks by keyword, title, author, or words in the full text. Type in your search terms, select the type of search (eg. author) and click on Search.

Advanced Search

The advanced search enables you to combine fields (eg. author and keyword), to limit your search by year, publisher or language, and to sort your results.

Search Results

The search results screen lists the number of eBooks matching your query and provides brief details for each title. You can display the results by date, or alphabetically by title or author.

The **Revise Search** option takes you back to the advanced search page if you wish to edit or refine your search. Click on **View this eBook** to access the full text. You can browse online for a short period.

Select **Show Details** to view the full record, including hyperlinked subject headings which you can click on to find other titles on the same subjects. From the eBook Details screen you can view, check out, add to your favorites or email the details.

Viewing an eBook

After performing your search, the eBook is displayed when you select a title from your results, or, within your chosen record in NOAALINC, click on the URL link.

Use the **Previous** and **Next** buttons on the navigation toolbar at the top of the document to turn the pages, or type in a page number and click on **Go**.

The panel on the left of the screen lists the Table of Contents, which you can use to select specific chapters and subsections for viewing. Click on the plus (+) signs next to the headings for more detail.

You can also use the **Search this eBook** option at the bottom left of the screen to find terms within the content. The display will show the first page containing your term and you can click on **Next** to view further hits.

A **Dictionary** is available on the left of the screen for looking up unfamiliar terms.

Printing

Due to copyright restrictions you can only highlight one paragraph at a time of an ebook to copy and paste. You can only print one page at a time. It is in a frame environment so you need to make sure your cursor is blinking in the right frame to print the page. You can also achieve this via print preview and select the frame you want to print.

Creating an Account

If you wish to create a favorites list and keep notes you will need to create an account. On the NetLibrary homepage click on **Create a Free Account** at the top right of the screen, then fill in your details and submit.

Whenever you visit NetLibrary you can **Log In** and access your favorites, notes and account details via the links at the top right of the homepage.

If you have logged into your own account, click on **Log Out** at the top right of the NetLibrary homepage when you have finished.

Adding Notes

While viewing an eBook you can annotate pages and save your notes. Click on the Notes tab in the panel on the left. Give the note a descriptive Name and then fill in the Note text field (up to 500 characters). Click on **Add Note**.

You can access your notes again by clicking on Notes within an eBook or from the Favorites and Notes link on the top right of the NetLibrary homepage.

Closing E-books

Click **close item** when done rather than closing the browser or clicking the browser back button. This closes the eBook and makes it accessible to other patrons without a delay of 15 minutes.
