

Betty Petersen Memorial Library
NOAA Science Center, World Weather Building
5200 Auth Rd.
Camp Springs, MD 20746

What would you like to do?

A guide to databases in your library

Find out if we have a book in the library?

From the library homepage, click on "Search the Catalog" in the left-hand menu.

Search for articles on aquatic science and oceanography?

Try the ASFA database, available from the Databases page on the library website.

Search for articles specifically on meteorology, climatology, atmospheric chemistry and physics, astrophysics, hydrology, glaciology, physical oceanography or environmental sciences?

Try the Meteorological and Geostrophysical Abstracts (MGA) database, available from the Databases page on the library website.

Search for articles on computer science?

Try CiteSeer.IST on the Databases page on the library website.

Search for articles in more general fields?

Try ArticleFirst from First Search (username and password available from the librarian) or Web of Science, both on the Databases page.

Find out how many times a specific article has been cited?

Try Web of Science from the Databases page on the library website.

Evaluate and compare journals using citation data?

Try either Journal Citation Reports or SCI Journal & Country Rank from the Databases page on the library website.

Find books about Information Technology online?

Check www.netlibrary.com or go to "IT Resources" from the library homepage.

Track references and create bibliographies?

Ask your IT support to install Endnote, available for free from the NOAA IT Electronics Store at <http://www.nites.noaa.gov> or register for Endnote Web at www.myendnoteweb.com
